

1708.  
*Speculum anni à partu*  
*Virginis*  
M DC XLII.

OR

*An Almanack for the*  
yeare of our Lord God  
1642:

Being the second after Biffextile or Leap-  
yeare, and from the worlds creation (ac-  
cording to the accounts in Scripture)  
5573: which is lesse by 18 years then  
*Scaliger* reckoneth.

Calculated properly for the famous Uni-  
versitie and Town of *Cambridge*,  
where the pole is elevated  
52 degr. 17 min.

---

*Felix qui potuit rerum cognoscere causas.*

9

Shillings.			
In every piece of	33	the reme- die must not exceed	4 grains and an half.
	30		4 grains and an half.
	22		3 grains.
	20		3 grains.
	16 & 6 pence		2 grains and an half.
	11		2 grains.
	10		2 grains.
	5 & 6 pence		1 grain.
	5		1 grain.
	4 & 4 pen. 3 fur.		1 grain.
	1 & 9 pence		half a grain.
	1 & 6 pence		half a grain.

And note, that any piece of old gold, (as a 22 or 21 shillings piece) is payable for two pence a grain, when it exceedeth the remedie if it want not above the double remedie. But for new gold, (as 20, and 10) they must never exceed their remedie; for if they do, they are not to be offered in payment. Neither are the 22, 11, and such like, to be taken, if they exceed the double of their remedie. By observing this difference, the former table will be well understood.

**W**hen Advent-sunday cometh, marriage is forbidden untill Hilare, or the 12 of January. Then at Seprunge-sunt it goeth out again untill Low Sunday. Afterwards at Rogatione it is also forbidden: but at Trinity-sunday it cometh in again, and so continueth untill Advent.

263. 12. 11. 11. 11.  
1105: 68 (205. 1106: 10)

Of the foure parts or quarters of the yeare.

**T**hat the world began in Autumne, is of late the opinion of many, both Divines and Chronologers. And yet of old the ancient Fathers (Eusebius, Basil, Athanasius, Ambrose, Cyril of Jerusalem, Augustine, Nazianzene, Damascen, Bede, Isidore, &c.) were perswaded otherwise. Yea, in a Synod holden in Palestine by Theophilus Bishop of Cæsarea, it was agreed that the world was made in the Spring. Nor is that but a great question betwixt two famous Rabbins: For though the Rabbins (for the most part) be for Autumne; yet R. Josua maintains the contrary, against Eleazar another great Rabby, who contends for Autumne. True it is that the yeare of Jubilee began alwayes at the Autumne: howbeit the first moneth of the yeare was to be reckoned from the Spring, which is as Moses saith to the Israelites, *Exod. 12. 2. This shall be to you the beginning of moneths*: as if he had said, Though whilest you were in Egypt you followed another reckoning, yet it was divers from that which ye had at the first: for *This is to you the beginning of moneths*, or the naturall head of the yeare. Nor did the Chaldeans, with whom Abraham lived a long time, reckon otherwise. And successively since Astrologers have accounted the revolutions of the world from the Vernall equinox, at the sunnes entrance into the first scruple of Aries; which will be this yeare on thurs- day, March 10. 45 min. past 9 morning, the begin-

ning or 36 min. of the first degree of Cancer then ascending: at which time I find the sunne in the xi house of the heavens, and Mars in the eighth. Jupiter looks upon the Horoscope with a trine aspect, but the sunne beholds it with a quartile. With the like aspect do the Pleiades look upon the cuspis of the tenth house: but Arcturus beholds it with a trine. In this quarter the Sun is chief dominatour, with whom Mars hath a share and is in Capricorn, the house of Saturn. It is like to be moist and cold enough, and cloudy at the time of this revolution; but afterwards hotter and dryer weather, varying chiefly according to the aspects of the Sun & Mars with the other planets. The Sun is also chief Lord of the whole year, and Jupiter the next in that dominion with him: a probable signe (as I take it) of much fair and dry weather. White clouds we may have often, both in the spring and summer, but perhaps little rain. The greatest dominion that Jupiter hath will be in the summer, for then is he the chief dominatour; to whom the next in power is Luna, the one in the fifth house the other in the seventh. This quarter begins June 11, 39 min. past one in the afternoon, at which time the 17 degree and 18 min. of Libra ascends; the cuspis of the tenth house being in the 23 degree of Cancer, at which the moon looks with a quartile aspect.

In Autumne the season is like to be more variable: for then Mercury, Venus, Saturn, & the Moon have domination; stirring up more storms of wind and

and wet, then have been formerly. This quarter begins September 13, 21 min. past 4 morn. at which time I find the 12 degree and 42 min. of Virgo ascending, the weather not unlike to be blustering, wet, and something cold. Mars is near a trine to the horoscope, Jupiter almost in opposition to it: Saturn and Mercury in opposition also the one with another, and the Moon within 18 houres of her change.

The next is Winter, in which quarter Saturn and Venus will be the chief rulers, whereupon the weather is like to be misty and cold, with more snow and wet then in some of our late Winters. And at the beginning of this season expect windy storms. It begins on the 11 day of December, 21 min. past 3 afternoon; at which time the 25 degree and 3 min. of Gemini ascendeth: the cuspis of the tenth house being then in the 18 degree of Aquar. which is indeed a very rainy part of that signe. The Moons place is opposite to the ascendent, she comes to her change within three houres after: Jupiter and Mercury are in a quadrate, and therefore the more like to have cold winds and wet stirred up.

**T**Here will be two great Eclipses visible in our horizon, both of the Moon. The one, on the fifth day of April, in regard of the ending and continuance: but on the fourth, in regard of the beginning. It continues, from first to last, three houres and 50 minutes.

*Dove 1642.*

The beginning } at { 11 and 48 min. afternoon.  
 The middle } at { 1 and 43 min. } in the morning.  
 The end } at { 3 and 38 min. }

At 54 minutes past twelve, she begins to be totally darkned, and at 32 minutes past two she begins again to recover some of her borrowed light: so that she remains in totall darknesse for the space of one houre and 36 minutes, and is eclipsed to the quantitie of 18 digits and 26 minutes, with 37 seconds. The chief dominatours be Saturn and Mars, the two malevolents: the effects are therefore like to prove the worse, when once they begin to work. Saturn stirs up adverse storms, thick clouds, darknesse, troubled humours, fluxes, quartern agues; and among beasts evil diseases, and such like. Mars inclines to hot feavers, irruptions of blood, stirs up hot winds, pestilentiall aires, Hathings and lightning. And as for the time, the effects are said to last three monthes and 25 dayes.

The other eclipse will be on the 28 of September: it continueth three houres and 47 minutes.

The beginning } at { 1 and 47 min. }  
 The middle } at { 3 and 41 min. } in the morning.  
 The end } at { 5 and 34 min. }

At 51 minutes past two she begins to be totally darkened, and at 31 minutes past 4 she begins to recover some of her light again: so that the time of her totall darknesse is one houre and 40 minutes; and the digits are 20 and 22 minutes, with 16 seconds. Mercury seems to be chief dominatour, with whom Mars may be joyned as partner: Nor do the effects differ greatly from those in the last years eclipse, viz. 1641.

In the next year there will be also another eclipse of the same luminary visible here in England. And in the year after that, the Sun will rise 13 minutes before he be fully delivered from an eclipse; the beginning whereof is seen to the Eastern parts of the world, and not here.

*Dove 1642.*

*The yeare, moneth, and day, The number of years Yeares expired  
ascending the year to begin moneths, and dayes, since every king  
the first of January, whereon that each of them began and end-  
every king of England since reigned: 28 dayes of their seve-  
the conquest, began his reign to a moneth. 28 dayes.*

*The use of this table in example.*

King Henry 8 began his reign April 21 1509: Hereigned  
37 years, 10 moneths, and one day. And it is since he began his  
reign 133 years complete April 21 in this yeare 1642. Now to  
know how long it is since the end of his reign, before his name  
on the right hand, you shall find 94 years since he died, Jan. 28.

Full moon the 6 day, 30 min. past two in the morning.

☐ Last quarter the 13 day, 10 min. past 10 at night.

♂ New moon the 20 day, three quarters past one afternoon.

First quarter the 27 day, 17 min. past 4 afternoon.

On the tenth of this moneth the Sunne enters into Aries,  
 at three quarters past nine of the clock in the forenoon, the  
 middle of the first degree of Cancer then ascending; and  
 the 24 of Aquarius in the mid heaven. Saturn and Venus  
 will be in conjunction but the day before about one in the  
 afternoon; the weather misling, cold, and cloudy.

Mercury began to be retrograde about the first of this moneth, continuing so untill the 23 day, at which time Sun and Venus will be in conjunction, about 7 of the clock at night: and then doth Venus begin to be Occidentall. In this moneth also the Moon will be eclipsed totally, as may be seen on the fifth day, if clouds hinder not.

Venus is direct in motion all this year, & on the 3 of this month the Pleiades (or 7 stars) and she will be both together; at which time, or rather on the day after, the ayr is like to be tossed with turbulent storms, when ☾ shall be in opposition to ☉ at noon, & to Venus about 4 houres after. But that which is most remarkable in this month, is the cōjunctiō of ♃ & ♄, as also the cōjunctiō of ♀ & ♄ in ♋

Mars went out of Pisces (the house of Iupiter) on the sixth of this month; but Saturn & Iupiter are still abiding there, and do both of them, about the 27 day, begin to be retrograde; Iupiter continuing so untill the 22 of October, and Saturne untill the eleventh of November. And on the eleventh of this month ☉ enters ♉. at 39 mi. past 1 afternoon.

On the 26 of this month Mercury is the second time retrograde, and continueth so untill the 18 of August. And note, that about the time when he begins to be retrograde, he wil be in coniunctiō with Venus in the 5. degree of Virgo, about 23 degrees distant from the Sun, & then (as the day before) is like to be showring weather.

Mercury begins to be direct, after his former retrogradation on the 18 of this month, continuing so untill the 9 of November: from whence he is again retrograde untill the 11 of December: after that direct. And on the 7 of this month he is found to be in the lower part of his Epicycle: and on the 9 in conjunction with the Sun at noon.

305			all: Joseph.	1682
	3902	30	The Roman Monarchy beginneth	1671
			C 3 In	

3927 5

In this yeare, at Autumne, began the first yeare of our Saviour, according to the true time of his birth, and right at count of Herods raigne.

1646

3931 1

The yeares af-  
ter Christ.

In this yeare on the 25 of December, was our Saviour borne, according to the common account receiv'd from Dionysius Exiguus: neverthelesse begins not the first yeare thereof untill the January after.

1647

3932 6.1

This was the first yeare of Christ according to the foresaid Dionysius: to which time the yeares before Christ, throught out this Table, have had their reference; and by which (as it runneth on) I shall date the Accidents following; adding only (for a while) the true yeares of Christ on the left hand of the other, in the same Columnne with them.

1648

3937 31.26

In this yeare, at Autumne, began the 31 yeare of Christ, about such time as he was baptized of John in Iordan: for at this time (as S. Luke affirmeth) our Saviour was as it were 30 yeares old.

1611

3960 34.29

At the Autumne of this yeare began that Jubilee in which Christ suffered.

1612

3961 35.30

In this yeare, at Easter, on the 7 of April. was the end of Daniels Weeke, and then was the Passion of our blessed Saviour; his 35 yeare of age not beginning untill the Autumne after; so that the whole age of our Saviour, was 33 yeares and an halfe. Dan 9. 27.

1613

3962 36.31

Stephens Martyrdom, and Pauls Conversion.

# Dove. 1642.

## Memorable Accidents.

Time expired.	Years of the world.	Years of Christ.	Memorable Accidents.	Time expired.
			version This was 36 yeares before Paul and Peter suffered	1611
1646	3975	49.41	Agrippa, who put S. James to death is eaten up of worms	1598
	3992	66.61	Rome, by the commandement of Nero, is set on fire.	1581
	3994	68.63	The beginning of the first Persecution of Christians, in the tenth yeare of Nero.	1579
1641	3997	71.66	Saint Paul is beheaded at Rome, and S. Peter crucified	1576
	4001	75.70	Jerusalem destroyed by Titus.	1572
	4006	80.75	In this yeare the Temple of Peace at Rome is finished and dedicated by Vespasian, into which the Dynanients of the late Temple of the Jewes are put	1567
	4020	94.89	The second Persecution begins under Domitian.	1553
1641	4021	95.90	Saint Iohn banished unto the Ile of Pathmos.	1552
	4026	100.95	About this time S. Iohn writes his Revelation, see Irenæo lib. 5.	1547
	4031	105.100	The third Persecution under Trajan.	1543
1611	4045	119.114	The Jewes rebelling against the Romans, are miserably slaine in Egypt and Cyprus, to the number of 200000.	1528
1611	4057	131.126	The fourth Persecution under Adrian.	1516
	4066	140.135	A new towne built whereabouts the old Jerusalem was, and called Aila. This towne was set up not farre from the Hill Gihon and Golgotha where Christ was crucified; and over the Gates, in contempt of the Jewes, was set up a Stone cut in Marble.	1507

Memorable Accidents.

Year of the world	Christ.	Event	Time expired
4098	167	The first Persecution under M Aurelius.--	1075
4108	177	Lucius began his raign: and in his time Englin received the Christian faith --	1465
4133	202	The first Persecution under Severus. --	1440
4134	203	The Christian faith received in Scotland. --	439
4167	236	The 7 Persecution under Maximianus. --	1406
4182	251	The 8 Persecution under Decius. --	1391
4188	257	The 9 Persecution under Valerianus --	1385
4233	302	Dioclesian begins the 10. Persecution --	1340
4255	324	Constantine procures a peace for the Christians: He was the first Christian Emperour. --	1318
4256	325	The first Generall Councell --	1317
4263	332	Christiā Churches built by Constantin about this time, & maintenance given to them: For in the tenth Persecution these Churches were greatly demolished. --	1310
4546	615	The Persians take Ierusalem from the Romanes --	1027
4566	635	Cambridge (according to Gratton) was, about this time, made an Univerſitie. --	1007
4568	637	The Sarazens take Ierusalem from the Persians --	005
1941	1010	The Turks take Ierusalem from the Sarazens. --	632
997	066	England conquered by Duke William --	976
1000	1099	Ierusalem conquered by the Christian Godfrey of Bullen, & taken from the Turks. --	543
1118	1187	Ierusalem taken from the Christians againe by Saladin the Sultan of Egypt, after it had bin in the possession of Christian Kings by the space of 88 yeares --	455
121	1190	The first Mayor of London --	452
311	1380	The invention of Gunnes --	262

The Invention of Printing

Egypt is added to the Turkish Em-  
pire, together with the Holy Land, and  
Ierusalem; which hath ever since remai-  
ned under his dominion.

In the same yeare Martin' Luther wri-  
teth against the Popes Indulgences.

H. Henry the 8 conquers Bul'ogne.

The contagious sweating Sicknes.

Coaches first used in England.

The Royall Exchange in London

The Massacre of Protestants at Paris  
in France: And in the same year an admi-  
table new Starre appeared in the Con-  
stellation of Cassiopea: It was seene a  
whole yeare, and about five moneths.

The whole Heavens seemed to burne.

A great Blazing Starre.

An Earth quake in England, Apr: 6 And  
in the October following, another Bla-  
zing Starre.

Another such star in this yeare, May. 15.

Tilbury Campe on S. James his day

The boyage to Cadiz.

The Gunpowder Treason.

The great frost

The last blazing Star.

Our Kings return out of Spaine Octo-  
ber 5.

Mary our Queene arrived at Dover on  
the 12 day of June

On the 29 of May our young Prince  
Charles was borne. And on the 29 of Fe-  
brua y before going the Plague began  
at

## Observations for Husbandmen.

**I**N *Ianuarie* take off superfluous branches from Fruit-trees, and prepare your ground for Gardens, uncover Tree-Roots, cut your Vines in some of the Twelve dayes.

Set Quick-sets, Roses, and Sallets in the moneth of *February*; And now cover up the Roots of your Trees with good Earth, which you opened before in the beginning of *Ianuarie*.

In *March* you may graft; but in planting and grafting chuse a warme time: wherefore let not the winde be in the East or North, because such windes are commonly nipping, especially being helped by any aspect of the Moone with *Saturne* or *Venus* in cold Signes, as *Virgo*, *Capricorne*, *Taurus*, *Scorpio*, *Pisces*, or *Cancer*.

In the end of *April*, or beginning of *May*, set and sowe tender Herbes and Seeds in your Gardens, in a good temperature of Aire.

If you meane to preserve Flowers or Seeds, gather them in a full Moone: let the Sunne shine first upon them, and they will keepe the better; but let them not be dried in the Sunne, lest the Sunne draw away part of their vertue.

Remove young trees, either in the end of *October*, in *November*, or *February*, the Moone encreasing, and be sure to set that side South, which was South before, because it cannot endure the cold North.

Sheare sheepe the Moone increasing, and their fleeces

Dove. 1642.

Beeces will grow the better againe. The like observe for cutting of haire, the Moone in *Taurus* *Virgo* or *Libra*.

Geld cattell, the Moone in *Aries*, *Sagittarius*, or in *Capricorne*, being in her last quarter.

Gather all fruites that you meane to keepe, in a dry time, when the Moone is at the full.

Sow all such Seedes as have round rootes (as Onyons, Leekes, Turneps, &c.) either three or foure dayes before the full, or three or foure dayes after the full.

FINIS.
